SUMMARY

Detail-oriented B.Tech graduate in AI & Data Science with a strong foundation in Python and logical troubleshooting. Experienced in developing interactive applications and analyzing datasets. Seeking to leverage analytical mindset, systematic testing skills, and technical proficiency to contribute as a Game QA Tester.

PROJECTS

Snake and Ladder CLI Game | Python

- Developed and performed end-to-end testing for a Python CLI game, focusing on identifying edge-case failures and validating modular state transitions
- Executed functional testing on core game loops and input validation, ensuring system stability and high-quality performance under diverse runtime scenarios.

Amazon Prime Data Analysis | Live App

- Analyzed 9,500+ records to identify critical performance trends and data patterns, simulating the bug-triage process by isolating key performance anomalies.
- Utilized Power BI to create visual reports for tracking system metrics and growth trends, providing clear, data-backed insights to support decision-making and improve product quality.

TECHNICAL SKILLS

- Testing & Quality Assurance:** Manual Testing, Bug Reporting, Functional Testing, Test Case Documentation, Regression Testing, Edge Case Identification.
- Programming & Scripting:** Python, SQL, Git, GitHub.
- Tools & Platforms:** MS Excel (Advanced), Jupyter Notebook, Google Workspace.

TRAINING & INTERNSHIP

AlmaBetter Trainee - Data Science

Sep 2025 - Present

- Analyzed real-world datasets using **Python** and **SQL** and developed **Power BI dashboards** for data-driven decision-making.

Aegis I-Net Pvt. Ltd. Industrial Trainee - LINUX & Cloud

Jun 2023

- Gained hands-on experience in Linux systems and cloud computing fundamentals.
